

What's New in BG-Map 2016 and How to Access the New Features

Note: The User's Manual and Help Screens will provide more detail. This is a summary.

Support for CMS IntelliCAD 8.1

What it Does

BG-Map no longer requires AutoCAD. It can also be used with CMS IntelliCAD 8.1.

How to Access

- ❖ Install CMS IntelliCAD 8.1.
- ❖ Go to Tools/Options/User Setup.
- ❖ For CAD type, select "IntelliCAD CMS 8.1."
- ❖ For CAD program location, select the Program Files folder containing CMS IntelliCAD.
- ❖ Save and restart BG-Map.
- ❖ For further details, see: http://www.bg-map.com/userdata/CMS_ICAD.html

New User Setup Screen in BG-Map

What it Does

You can set up BG-Map, including file locations, CAD type, and basemap file, without the need to using the User Setup program to edit the user ID file.

How to Access

- ❖ Go to Tools/Options/User Setup

Create New Accessions and Plants Using "Free Form" Accession Numbers

What it Does

When using BG-Map to create new *BG-BASE* accessions or plants, you can create accession number using any format. You are no longer restricted to a format set up by going to Tools/Options/Create BG-BASE Plant Options.

How to Access

- ❖ Go to Map/Create a BG-BASE Plant.
- ❖ Click "Enter Free Form Accession Number and Qualifier."

Images Can Be Attached to Horticultural Management Work Orders

What it Does

When creating Horticultural Management Work Orders to be e-mailed, you can attach one or more images to the e-mail

How to Access

- ❖ Go to Tools/Horticultural Management/Horticultural Workorder.
- ❖ If you wish to attach images when e-mailing the Work Order, you must link the Work Order to one or more plants. Enter the images in the table.
- ❖ Click "Help" for further details.

Any Printer Can Be Used to Print Book Maps and Large Format Maps

What it Does

You can use any printer for book maps and large format maps without the need to create special plotters: BGM-PR-SM, BGM-PR-LG and BGM-PLOT.

How to Access

- ❖ Go to Print/Print Options, and click "Help" for details.
- ❖ Also see the revised: "[Configuring Printers and Plotters for BG-Map.](#)"

Search Tool Queries Can be Saved and Reused

What it Does

When using the Search Tool to find plants or facilities management objects, you can save the search criteria and sorting options to use another time.

How to Access

- ❖ The Search Tool can be accessed from Generate/Look Up/Zoom to a Plant, Print/Plant Lists/Plants Selected With Search Tool and from the Facilities Management Module.
- ❖ To save a new query, click "Save Query" and select "New." Enter a code of

up to 12 characters and a query description. To recall a previously saved query, click "Recall Query."

New Quad Up Option to Repeat Previous Location When Deleting a Plant

What it Does

Automatically repeats the previous location code *in BG-BASE* when a plant is deleted from the map.

How to Access

- ❖ Go to Tools/Options/Quad Up Options
- ❖ Refer to the Option "When Deleting a Plant From the Map."

Option to Delete Original Item When Copying an Item to an Item

What it Does

When using the Developer Utility "Copy an Item to an Item", you now have an option to delete the original item after copying. This is useful for changing the key to a database record.

How to Access

- ❖ Go to Utilities/Developer/Copy an Item to an Item, and follow the prompts.

Other New Features and Improvements

- ❖ **Web-VQF/ECM** – Allow designating a course as "Online"
- ❖ **Web-VQF/ECM** – Added staff search by Defined Views
- ❖ **Web-VQF/ECM** – Updated formatting of mobile interface
- ❖ **Web-VQF/ECM** – Fixed problem with clicking Alert Box in mobile mode
- ❖ **Web-VQF/ECM** – Fixed "Show Map" links in mobile mode
- ❖ **Web-VQF/ECM** – Show larger images for plant search in mobile mode
- ❖ **Web-VQF/ECM** – Added tags <ng> </ng> to prevent a glossary word from being hyperlinked
- ❖ **Web-VQF/ECM** – Added "No name" regions defined by defined views, allows eliminating plant names from crowded sections of the visitor map
- ❖ **Web-VQF/ECM** – Added option for showing only primary common name in visitor mode.
- ❖ **Web-VQF/ECM** – Added option for designating the number of plants to

show initially in visitor mode.

- ❖ **Web-VQF/ECM** – Staff can add plants/accessions and enter field data
- ❖ **Web-VQF/ECM** – Allow designating Title image in AssetBank -
AccessLevel = "TitleImage"
- ❖ **Web-VQF/ECM** – Added utility to purge AssetBank data
- ❖ **Web-VQF/ECM** – Allow Staff to access course pages
- ❖ **Garden Notepad Plus** – Allow editing multiple images collected by GNP
- ❖ **Garden Notepad Plus** – Added DBH Height field
- ❖ **Garden Notepad Plus** – Added I_TREE fields
- ❖ **Facilities Management** – Allow saving search tool queries
- ❖ **Facilities Management** – Allow converting Objects to Web-VQF memorial
Garden Features.
- ❖ **Facilities Management** – Allow attaching images to workorders.
- ❖ Various Other Bug Fixes and Improvements
